ANSWERS:

1. Condoms and Femidoms are the only methods of contraception to protect you from Sexually Transmitted Infections **TRUE** Condoms provide a barrier method. Some STI's can be passed on through skin to skin contact.
2. Genital Warts and Genital Herpes never really go away **TRUE** they are a virus and can stay with a person for life even once the sores are treated.
3. You can't catch an STI if you have a shower after sex **FALSE** washing straight after sex is a myth you can still get an STI.
4. You always know when you've got an STI **FALSE** Some STI's have no symptoms at all.
5. A Clinic will always contact you if your tests come back positive **TRUE** Results are often sent discretely via text or email.
6. You have to have sex to get thrush **FALSE** Thrush is a yeast infection usually caused due to an imbalance in the vagina. Thrush can be passed in through oral or penetrative sex but it can often occur due to stress, hormones or even a change in shower gel.
7. You have to sleep with lots of people to pick up an STI **FALSE** You could catch an STI by sleeping with one person, (Two people who have never had sex before cannot create an STI) If your partner has sexual history there is always a chance of an STI.
8. You can't get an STI if you give someone oral sex **FALSE** Many STI's can be passed on to the mouth through oral sex. (Mouth to Penis, Anus or Vagina).
9. 'Blue Waffle' is a new STI **FALSE** Blue Waffle was created on Photoshop it is not a real STI.
10. You can only have one STI at a time **FALSE** Often if you are run down you could be at risk of illness and/or another STI. This is not always the case but it is possible to have more than one STI.
